OUR METHODOLOGY

Xcelerator's project-based learning methodology is designed to provide students the right balance of learning and application. We don't spoon-feed the students but provide them with guidance and support to enable project completion. The Program provides students with safe environment to experiment and push their boundaries without the fear of failure. The methodology teaches ownership and encourages the students to think and work independently.

- Student Counselling and Enrolling
- Mentor Conversation
- Student goes through project pre-reading
- Pre-task conversation / Student completes task / Post-task review & feedback / Student incorporates feedback
- FOR EVERY TASK
- Final Project Evaluation
